

Cambodia's Smart EV Charging Operating System

We turn installed EV chargers into a managed, revenue-ready network — mobile apps, operator dashboards, and local payments in one platform.

• THE CHARGING OPPORTUNITY

EV hardware only earns when payments, uptime, pricing, and support work as one system.

Payments

Local checkout drivers already trust — or adoption stalls at the plug.

Uptime

Live visibility into every charger — or operators stay reactive.

Support

A clear path to start, pay, and get help — or drivers walk away.

- FROM HARDWARE TO MANAGED REVENUE

Installed hardware, managed.

Without EV Cambodia

- ✗ Manual payments slow down driver adoption.
- ✗ Poor uptime visibility leaves operators reactive.
- ✗ Drivers are unsure how to start, pay, and get support.

With EV Cambodia

- ✓ Mobile app + ABA PayWay creates a local customer journey.
- ✓ CSMS dashboards track revenue, uptime, tariffs, and alerts.
- ✓ OCPP monitoring keeps multi-site networks visible and scalable.

• ONE MANAGED PLATFORM

Everything connected, one place to manage it.

DRIVERS

Branded mobile app — discover, charge, pay, get receipts and support.

EV Cambodia Platform

CSMS Dashboards

ABA PayWay

Tariffs & Roles

OCPI Roaming

Alerts & Reporting

CHARGERS

Any OCPP hardware — remote commands, meter values, and fault events.

• SIX SOFTWARE MODULES

A revenue-ready charging network, module by module.

DRIVER APP

EV Charger Mobile Apps

Branded iOS & Android flows for discovery, charging, payment, receipts, and support.

CSMS

CSMS Dashboards

Chargers, sessions, revenue, uptime, alerts, tariffs, and operator roles in one place.

PAYMENTS

ABA PayWay

Local checkout built for Khmer bank apps, QR habits, and faster reconciliation.

PROTOCOL

OCPP Connectivity

Connect charger hardware, remote commands, meter values, and fault events.

ROAMING

OCPI Roaming Integration

Connect your network with external eMSPs and roaming partners across the region.

MINI APP

Mini App

Lightweight map access, charger discovery, and instant payments for travelers.

• DRIVER APP & LOCAL PAYMENTS

Drivers pay the way they already pay.

A branded app for discovery and charging, with ABA PayWay and KHQR checkout that Khmer bank users and travelers already trust.

- ✓ Discover, start, and pay in a few taps
- ✓ ABA PayWay & KHQR at every charger
- ✓ Receipts and in-app support, automatically

• THE OPERATOR DASHBOARD

See revenue and uptime across every site.

CSMS dashboards bring sessions, revenue, uptime, tariffs, alerts, and operator roles into a single view.

Revenue

Uptime

Tariffs

Alerts

Operator roles

• CONNECTIVITY & ROAMING

Open standards keep your network flexible.

OCPP

Connect any compliant hardware

Remote commands, meter values, fault events, and network expansion — without vendor lock-in.

OCPI

Roam with regional partners

Seamless roaming with external eMSPs so drivers from partner networks can charge at your sites.

• BUILT FOR YOUR BUSINESS

A charging model that fits your property.

01 Hotels & Resorts

Premium guest charging and paid amenity workflows for destination properties.

02 Commercial Real Estate

Tenant, visitor, and public charging with role-based operator reporting.

03 Retail Centers

Charging-led foot traffic, promotions, paid sessions, and repeat visits.

04 Fleets

Charging cost, uptime, driver usage, and depot performance visibility.

• NATIONWIDE COVERAGE

Across Cambodia's growth cities.

Charging station management with CSMS, local payments, and support — from the capital to the coast.

Phnom Penh

CSMS and local payments across the capital.

Siem Reap

Hotel, resort, and tourism charging operations.

Sihanoukville

Corridor and commercial charging for coastal demand.

Battambang

Kampot

Kep

• CASE STUDY • EV 168

One site to a six-city network.

EV 168 expanded from a single Phnom Penh site to a unified charging network across six cities — with one app, one CSMS, and ABA PayWay at every site.

[App Store](#)

[Google Play](#)

• EV 168 RESULTS

One platform behind the whole network.

6

cities running on one management platform.

1

branded app on iOS and Android for every driver.

100%

of chargers with ABA PayWay & KHQR checkout.

• WHY EV CAMBODIA

Cambodia-built, operator-grade, locally supported.

Local payment readiness

ABA PayWay and KHQR built in from day one — not a foreign checkout bolted on.

Operator-grade uptime

Live monitoring and alerts keep your network visible and dependable.

Multi-city growth stack

One platform that scales from your first charger to a national network.

• LET'S TALK

Turn installed hardware into a managed, profitable network.
